

Today's executive and secretary are required to produce more correspondence, memos and reports than ever before. To help cope with this increased *and increasing* demand for written documents, IBM has introduced the IBM EXECUTARY line of magnetic dictation equipment.

This is the Combination Unit...

a new communications link

for both

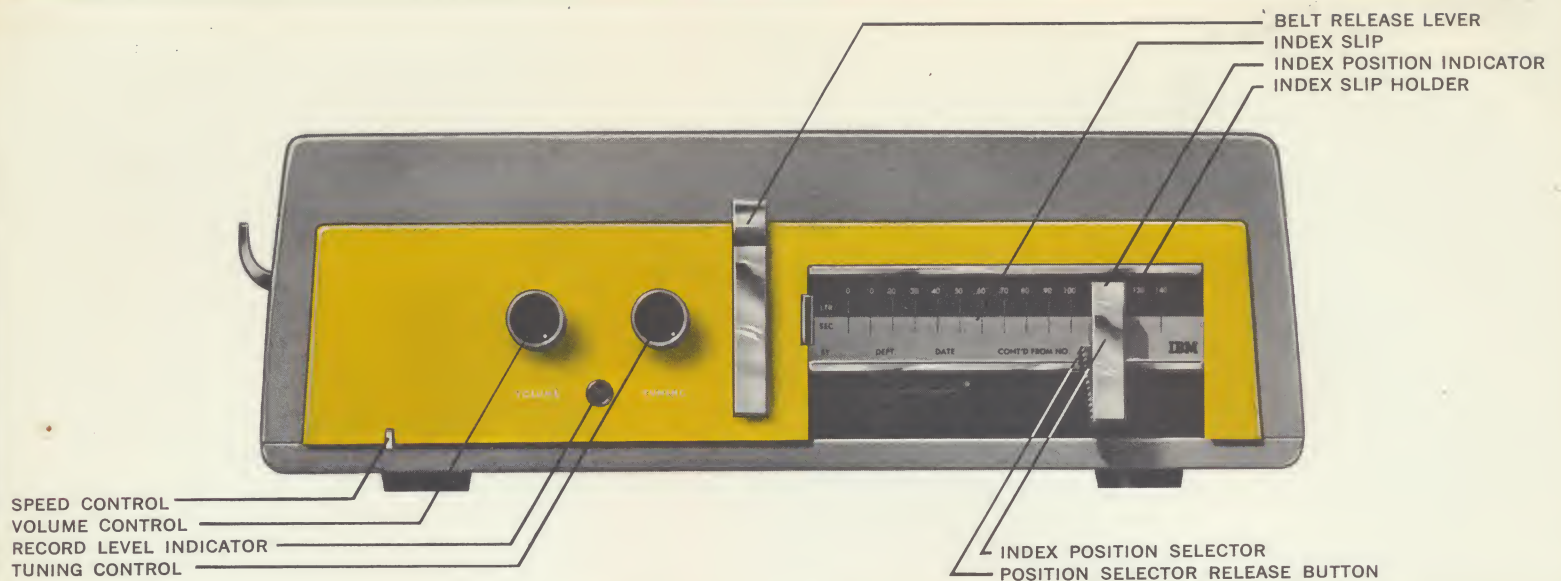

the Executive and the Secretary.

IBM[®]

EXECUTARY^{*}

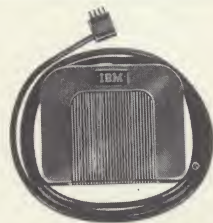

*TRADEMARK

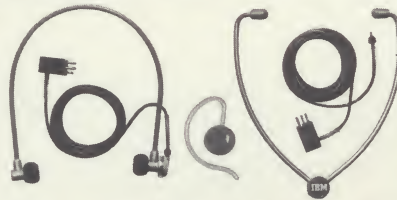

FEATURES: For Dictating—14 minute magnetic belt media, full remote control microphone including the following functions: dictate, dictate lock, listen, unlimited review in measured sequences, marking end of letters, and marking special instructions. Instant scanning, full range in-put and out-put volume controls, warning buzzer if no belt on machine; at the approach of end of belt; and at end of belt. Belt in motion light, record volume indicator light, belt release lever, dual purpose sound head with built-in erase circuit, punch through index slip holder, solid state amplifier, microphone hanger on-off switch, instant stop-start operation, error-free dictation through magnetic erasures of unwanted material, one-hand belt loading and unloading, play back through the microphone or through the built-in loud speaker, mechanical inter-locks for dictate and listen position on the microphone. High quality recording and play back.

For Transcribing—Instant stop-start with automatic back space of 2 or 4 words, single pedal, dual action foot control, continuous unlimited review by means of rapid return, full range speed and volume controls, fine-line tuning, visible indexing yellow and red panels, choice of ear sets*, built-in erase magnet with 6 second complete erasure. Grey front panel is Standard on the Model 213. Optional color panels are available at no extra charge. Model 213 operates only on 60 cycle 110 volt current. Machine dimensions 11" wide by 9¼" deep by 3¼" high. Weight, approximately 12 lbs. Comes complete with AC line cord, 2 magnetic belts, 2 correspondence folders, 1 pad of index slips, foot control and choice of ear sets.

*choice of ear set (1) 3-way combination including dual sponge eartips and plastic ear clips, (2) stethoscope monoset.

IBM[®]

Today's executive and secretary are required to produce more correspondence, memos and reports than ever before. To help cope with this increased *and increasing* demand for written documents, IBM has introduced the line of IBM EXECUTARY magnetic dictation equipment.

This is the **Dictating Unit...**

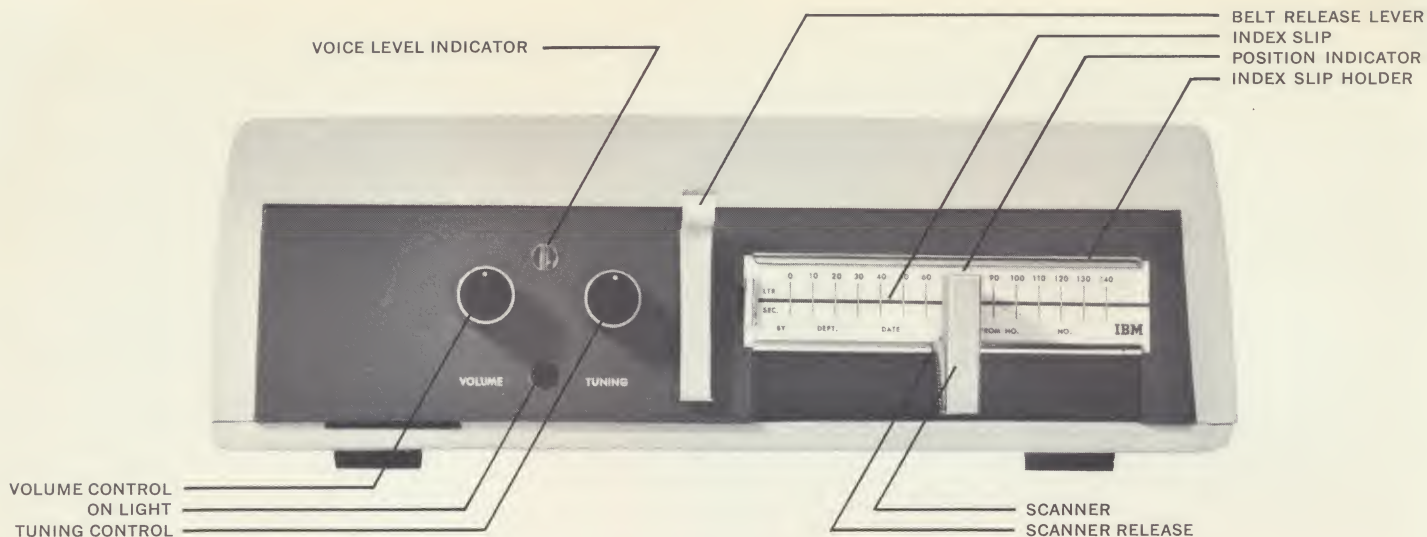

a new and easier way

to put your thoughts

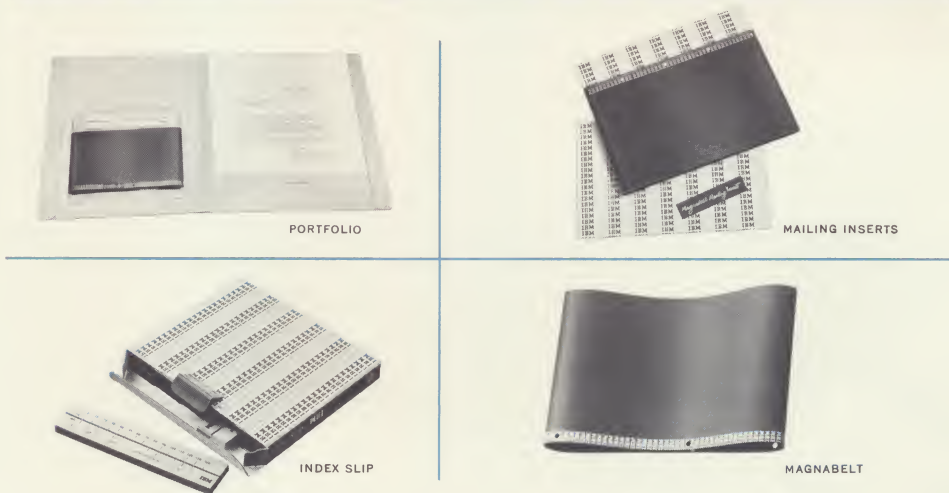

to work.

EXECUTARY[™]

FEATURES: 14 minute magnetic belt media, full remote control microphone including the following functions: dictate lock, listen, unlimited review in measured sequences, marking end of letters and special instructions. Instant scanning, fine-line tuning control, full range in-put and out-put volume controls, warning buzzer if no belt on machine; at the approach of end of belt; and at end of belt. Record volume indicator light, belt release lever, dual purpose sound head with built-in erase circuit, punch through index slip holder, solid state amplifier, microphone hanger on-off switch, instant stop-start operation, error-free dictation through magnetic erasure of unwanted material, one-hand belt loading and unloading, play back through the microphone or through the built-in loud speaker, mechanical inter-locks for dictate and listen position on the microphone. High quality recording and play back. Grey front panel is standard on the Model 211. Optional color panels are available at no extra charge. Model 211 operates only on 60 cycle 110 volt current. Machine dimensions 11" wide by 9 $\frac{1}{4}$ " deep by 3 $\frac{1}{4}$ " high. Weight, approximately 12 lbs. Comes complete with full power control microphone, AC line cord, 2 magnetic belts, 2 correspondence folders, and 1 pad of index slips.

■ To simplify dictating procedures, the same IBM Magnabelt may be used with all IBM Dictation Equipment—office, portable and systems units. And because it may be reused hundreds of times or even filed as a permanent record, this 14 minute magnetic belt brings maximum economy and flexibility to the operation of IBM Dictation Equipment.
